A BREAKTHROUGH
IN DISCOLORATION
CORRECTION

DISCOVER
EXOMELAN[®]

IN-CLINIC PROTOCOL + AT-HOME CARE

AN ADVANCED PROTOCOL IN CLINIC COMBINED WITH A CONSISTENT,
3-STEP HOME SKINCARE ROUTINE

This protocol is for you if:

You have hyperpigmentation caused by pregnancy or hormonal birth control (known as melasma)

You see sunspots on your skin

You're struggling with dark marks left by acne or cosmetic procedures

Results you'll achieve:

01 Visible reduction in discoloration

02 Fast-appearing results

First results after just a few days; full results after 3 months

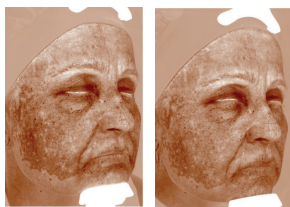

03 Protection against recurrence

The protocol works at every stage of discoloration development, ensuring that the results last longer

04 Safe even for sensitive, darker skin

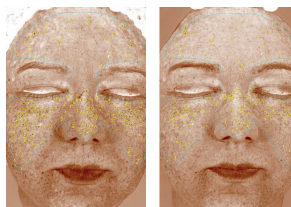

Results supported by studies

BEFORE

AFTER

BEFORE

AFTER

Results after 12 weeks:
33.5% reduction in the number and intensity of discolorations

Results after 7 days:
34.4% reduction in the number and intensity of discolorations

**FIRST RESULTS AFTER ABOUT 4 WEEKS.
FULL RESULTS AFTER 3 MONTHS**

– In more severe cases (e.g., hormonal melasma), the protocol can be safely repeated.

What sets EXOMELAN® apart?

The ingredients target exactly where they're needed	Thanks to 3 innovative encapsulation technologies, key ingredients are up to 20 times more effective than in their traditional, "free" form.
Visible results faster	The biomicroneedle system (2 million microneedles) opens microchannels, allowing the active ingredients to penetrate deeper and work more intensively.
Comprehensive action	10 active ingredients work simultaneously on 5 levels of discoloration formation – from calming melanocytes, to blocking pigment production, to accelerating the removal of existing melanin.

ACTIVE INGREDIENTS

10 active ingredients – what do they do for your skin?

01	Tranexamic acid soothes and reduces discoloration	06	Azelaic acid targets discoloration specifically
02	Niacinamide blocks pigment transport	07	Cysteamine reduces existing melanin
03	Retinol accelerates skin renewal	08	Butyric acid soothes and protects the skin
04	Hydroxytyrosol a powerful antioxidant	09	Vitamin C brightens and protects
05	Kojic acid evens out skin tone	10	Hexylresorcinol enhances brightening

Your path to results

At-Home Care – Your Daily Routine

3 PRODUCTS

Daily
reinforcement
of results

CODE: 75008

STEP 1

EXOMELAN® Corrector Serum 30 ml

Used daily, it evens out skin tone and restores the skin's radiance.

USE TWICE DAILY – morning and evening

STEP 2

EXOMELAN® Corrector Cream 30 ml

Enhances and prolongs the brightening effect, keeping the skin soft and comfortable.

USE TWICE DAILY – after applying the serum

STEP 3

Tint & Protect Cream SPF 50+ 30 ml

An absolutely essential step – protects against the recurrence of hyperpigmentation.

USE DAILY – reapply every 2 hours when in the sun

REMEMBER:

Just one day without SPF 50+ protection can undo the effects of weeks of care. Also avoid saunas, intense outdoor exercise, and harsh exfoliants without consulting a specialist – heat triggers discoloration just like the sun does.

01 Professional procedure
in clinic

02 Maintain the results longer
with at-home care
